

# *Semiconductors Microtechnology*

*by*

*Prof.Dr.Raid A.Ismail*

## **Contents**

- Development of semiconductor Technology**
- Materials for semiconductor devices**
- Doping and type conversion in semiconductors**
- Insulating Films on semiconductor**
- Photolithography**
- Metallization , interconnections , and packaging**
- Fabrication of devices and circuit components**
- MOS and bipolar technologies and their applications**
- Future developments in semiconductor microtechnology**
