

Introduction to visual basic	١
Elements of the integrated Development Environment (IDE)	٢
Forms and control tools-properties-events	٣
Make project save it and applications	٤
Working with standard projects-toolbox: textbox-label	٥
Working with forms, command button	٦
Working with list- shape-option button-check box	٧
Working with timer	٨
Dialogue boxes: Input box-message box	٩
Constants-variable	١٠
Declaration of a variable	١١
Operators for variable	
Input output methods	١٢
Strings : adding a strings, computing its length	١٣
Mathematical functions and variation functions	١٤
Menu editor	١٥
Code for menu item	
Control statements	١٦
If then statement	
Conditional If then statement	١٧
if then else statement	١٨
if then else with nested statements	١٩
select statement	٢٠
Loops: types of conditional loops	٢١
For next loop	٢٢
do while loop	٢٣
do until loop	٢٤
Nested loops	٢٥
Arrays: Arrays and loops	٢٦
Operations on array	٢٧
Strings	٢٨
