

TEMPLATE FOR COURSE SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

COURSE SPECIFICATION

This Course Specification provides a concise summary of the main features of the course and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. It should be cross-referenced with the programme specification.

1. Teaching Institution	University of Technology
2. University Department/Centre	Chemical Engineering Department
3. Course title/code	Computer Programming (I)/ 123
4. Programme(s) to which it contributes	BE.3207, CE.123, BE.3406, EG 104, BE.3106
5. Modes of Attendance offered	Full
6. Semester/Year	2 semesters/year
7. Number of hours tuition (total)	3
8. Date of production/revision of this Specification	15/10/2015
9. Aims of the Course	
<ol style="list-style-type: none"> 1. Learn the basics of computer and operation system Windows 7 and application program Office 2010 and programming language (Visual Basic) and used to solve the problems of chemical engineering. develop the mathematical skills necessary to solve practical problems 2. emphasizes the general principles and techniques of computer programming, which can be applied to almost any programming language. Although the emphasis is on programming in any language, this course focuses on one language, in particular, called Visual Basic. It provides the students with a basic understanding and appreciation of the various essential programming-languages constructs, programming paradigms, evaluation criteria and language implementation issues. 3. develop the mathematical skills necessary to solve practical problems 4. Equip you with the knowledge and skills for a range of careers in technology and computer-based industry 5. developing critical thinking skills, solving open ended problems and to work in teams. 	

10• Learning Outcomes, Teaching, Learning and Assessment Method

A- Knowledge and Understanding

- A1. Demonstrate the knowledge and understanding of the core ideas of programming languages.
- A2. Analyze a problem, and identify and define the computing requirements appropriate to its solution.
- A3. Apply algorithmic principles, and computer science in the design of problem solutions.
- A4. Understand and apply a wide range of programming principles to solve problems in different areas.

B. Subject-specific skills

- B1. Use basic components of Visual Basic programming language to produce valid computer programs.
- B2. Communicate questions to clarify program requirements
- B3. Compare between alternative programming languages approaches.
- B4. Apply appropriate programming language techniques to the development of advanced problem solutions.
- B5. To apply computer software to analyze practical problem

Teaching and Learning Methods

. Lectures using whiteboard and data show, Practical classes using software development tools and computers, Reports prepared by students and open discussion, Practical computer laboratory sessions & Exercises.

Assessment methods

- 1- Oral discussion after each lecture to assess understanding of the lecture content.
- 2- Midterm Exam to assess understanding of the 1st part of the course.
- 3- Oral Exam to discuss the student's projects.
- 4- Discussion of Semester work to assess how to write a correct report.
- 5- Final practical exam to assess acquiring of the practical and professional skills of the course
- 6- Final written exam to assess acquiring of the knowledge and understanding as well as all skills of the course.
- 7- Quizzes: Sometimes we do these quizzes to keep the student always in the course and to evaluate the intellectual skills and the understanding.
- 8- Home works: To test and help student training on exams.

C. Thinking Skills

- C1. Be able to write well-structured complex programs.
- C2. Apply design and development principles in the construction of programs used to solve problems in different areas.
- C3. To develop the students' ability to work effectively and to reinforce their individual responsibility for their own learning.
- C4. To interact positively with colleagues in a group context

**D.General and Transferable
personal development).**

Skills (other skills relevant to employability and

D1. Discussion of various types of programming languages

D2. Work effectively as a part of a team to apply skills gained throughout the course to construct programs that can be used to solve different problems

11. Course Structure

Week	Hours	ILOs	Unit/Module or Topic Title	Teaching Method	Assessment Method
1st semester					
1	3	Introducing Microsoft Windows 7	Microsoft Windows 7	Lectures and practical applications	partial test
2	3	Introducing Microsoft word	Microsoft word	Lectures and practical applications	Discussion /dialogue oral and evaluate opinions
3	3	Introducing Microsoft excel	Microsoft excel	Lectures and practical applications	Discussion /dialogue oral and evaluate opinions
4	3	Introducing Microsoft power point	Microsoft power point	Lectures and practical applications	Discussion /dialogue oral and evaluate opinions

5	3	Ability to characterization and specify of the programming issues related to the chemical engineering problems using visual basic	Introduction To Visual Basic Programming	Analysis of cases related to industrial applications	Discussion /dialogue oral and evaluate opinions
6	3	Description relations and their uses	<ul style="list-style-type: none"> • Menu bar • Tools bar • Project explorer • Tool box • Properties windows • Form • Code 	Lectures and practical applications	Discussion /dialogue oral and evaluate opinions
7	3	Description relations and their uses	<ul style="list-style-type: none"> • Controls: Command Buttons, Label, Textbox, Pointers, Picture box, frame. • Naming Controls. • Properties for controls: Height, Width, Left, Top, Font, Forecolor, Backcolor, Name, Caption, Text, and Visible. 	Lectures and practical applications	partial test
8	3	The ability to characterize and identify issues for programming	<ul style="list-style-type: none"> • Events. • Saving Visual Basic Project. • Examples: Chemical Engineering Applications. 	Analysis of cases related to industrial applications	Discussion /dialogue oral and evaluate opinions
9	3	Description relations and their uses	Mathematics <ul style="list-style-type: none"> • Arithmetic Operations: +, -, *, /, \, mod, ^. (Using Simple Example for each Operation).	Lectures and practical applications	Discussion /dialogue oral and evaluate opinions
10	3	The ability to characterize and identify issues for programming	<ul style="list-style-type: none"> • Logical Operations. AND, OR, NOT. And the Truth Table for each Operation. 	Lectures and practical applications	Discussion /dialogue oral and evaluate opinions
11	3	Description relations and their	<ul style="list-style-type: none"> • (Using Simple Example for each 	Lectures and practical	Discussion /dialogue oral and

		uses	Operation). • Relational Operation: $>$, $<$, $>=$, $<=$, $<>$, $=$. • String Concatenation (&).	applications	evaluateopinions
12	3	Descriptionrelationsand their uses	• Operation Precedence. For all arithmetic, logical, relational operators.	Lectures and practical applications	Discussion /dialogueoraland evaluateopinions
13	3	The ability tocharacterize andidentifyissue sforprogrammin g	• Print statement and Formatting. Illustrate (colon, comma, and semicolon).	Lectures and practical applications	Discussion /dialogueoraland evaluateopinions
14	3	The ability tocharacterize andidentifyissue sforprogrammin g	• Examples: Chemical Engineering Applications.	Analysis ofcasesrelated toindustrialapplicati ons	partial test
15	3	Descriptionrelationsand their uses	Built InFunctions • Built-in math functions: • Abs(x), Int(x), Rnd(x), sgn(x), sqr(x), str(x), val(x), round(x, n), CInt(x), Fix(x). • String Functions	Lectures and practical applications	Discussion /dialogueoraland evaluateopinions
2nd semester					
16	3	The ability tocharacterize andidentifyissue sforprogrammin g	• InputBox. • MsgBox. • Examples: Chemical Engineering Applications.	Lectures and practical applications	Discussion /dialogueoraland evaluateopinions
17	3	Descriptionrelationsand their uses	Selection Structure • Single Selection: If/Then structure. • Double Selection: If/Then/Else structure. • Nested If/Then/Else structure.	Lectures and practical applications	Discussion /dialogueoraland evaluateopinions
18	3	The ability tocharacterize andidentifyissue sforprogrammin g	• Select Case Multiple Selection Structure. • Examples: Chemical Engineering Applications.	Lectures and practical applications	Discussion /dialogueoraland evaluateopinions
19	3	The ability tocharacterize andidentifyissue sforprogrammin g	RepetitionStructure • For ... Next Loop. • While ... Wend	Analysis ofcasesrelated toindustrialapplicati ons	Discussion /dialogueoraland evaluateopinions
20	3	The ability tocharacterize andidentifyissue sforprogrammin g	• Do While ... Loop.	Lectures and practical applications	partial test
21	3	Descriptionrelationsand their	• Do ... Loop Until	Analysis ofcasesrelated	Discussion /dialogueoraland

		uses	<ul style="list-style-type: none"> • Exit Do, Exit For Examples: Chemical Engineering Applications 	to industrial applications	evaluate opinions
22	3	Description relations and their uses	<ul style="list-style-type: none"> • Variables • Data Types: Boolean, Integer, Long, Single, Double, String. • Valid Naming of Variables. • Initial Value for each Type of the Variables (Initial Value for each Data Type). • Size of each Variable Type in Bytes. 	Lectures and practical applications	Discussion / dialogue oral and evaluate opinions
23	3	Description relations and their uses	<ul style="list-style-type: none"> • How to Declare Variables. (Dim statement). • Using: Dim variable-name As Data type. • Using Suffix: Integer, Long, Single, Double, String. • Constant Variable. • Examples: Chemical Engineering Applications. 	Analysis of cases related to industrial applications	Discussion / dialogue oral and evaluate opinions
24	3	The ability to characterize and identify issues for programming	<p>ARRAYS</p> <ul style="list-style-type: none"> • Introduction: Defining Arrays. • Array Declaration Statement. • Assigning Values for Arrays (i.e. filling array's element value either by loop or by direct assignment statement). • ReDim Statement. • Using Loops with Arrays. (i.e. writing an application on array using loops). 	Lectures and practical applications	partial test
25	3	Description relations and their uses	<ul style="list-style-type: none"> • Two Dimensional Arrays. • Operations on Arrays: • Fill Array Elements with Random Numbers using Rnd Function. • Sorting. 	Analysis of cases related to industrial applications	Discussion / dialogue oral and evaluate opinions

			<ul style="list-style-type: none"> • Searching. (i.e. Linear search). • Swapping Two Elements. • Examples: Chemical Engineering Applications. 		
26	3	The ability to characterize and identify issue for programming	Graphics In Visual Basic <ul style="list-style-type: none"> • Graphics control • Picture box • Image box • Coordinate system • Pixel • Graphics methods (Line, Circle, pset) • Examples: Chemical Engineering Applications. 	Analysis of cases related to industrial applications	Discussion /dialogue oral and evaluate opinions
27	3	Description relations and their uses	Data Base <ul style="list-style-type: none"> • Accessing Database • Data Control DAO, ADO, RDO • Visual Basic and Access Connectivity • Examples: Chemical Engineering Applications. 	Analysis of cases related to industrial applications	Discussion /dialogue oral and evaluate opinions
28	3	The ability to characterize and identify issue for programming	Designing Reports <ul style="list-style-type: none"> • Introduction • Objective 	Lectures and practical applications	Discussion /dialogue oral and evaluate opinions
29	3	The ability to characterize and identify issue for programming	<ul style="list-style-type: none"> • Introduction to Report Designer • Creating Report <ul style="list-style-type: none"> • Data • Report • Data Environment 	Analysis of cases related to industrial applications	Discussion /dialogue oral and evaluate opinions
30	3	Description relations and their uses	Examples: Chemical Engineering Applications.	Analysis of cases related to industrial applications	Discussion /dialogue oral and evaluate opinions

12. Infrastructure
