

**Name of the research:** experimental study of mechanical properties of fiber glass reinforced composite with different matrices

**Name of the supervisor:** Asis.lec.nadia aziz butti

**Name of the students:** saif majid and ayad naji

**Summary:**

Mechanical properties of fiber glass reinforced composite with different matrices have been studied in this research. the matrices were poly ester and epoxy .the mechanical properties studied were:

- Hardness
- Tensile strength
- Bending
- Impact strength
